

## Summer to-do List for Incoming 4<sup>th</sup> Graders

Practice your math facts two to three times per week.... adding, subtracting, multiplying, and dividing. Use flash cards and take a 5 minute timed test. If you do not use them, you will lose them! These facts are the base needed to succeed in higher-level math.

Read - Keep reading and reading and reading to reach the goal of 1000 pages for the Summer Reading Challenge! Read all the 3<sup>rd</sup> grade, 4<sup>th</sup> grade, and higher-level books that you can. Read books that are a little bit of a challenge. Make a note of any words you do not understand. Look up these words in a dictionary then go back to the story and reread the word in context. This improves reading comprehension. Read out-loud to an adult or an older brother or sister. Have that person correct your reading and pronunciation. This improves reading fluency. Read quietly to yourself! Reading improves your reading level, and your knowledge and understanding of the English language. Reading also improves spelling, punctuation, capitalization, paragraph writing, and structure as you see writing in its correct form.
